# Main Points

- 3 liver mets procedures focussed on : J02 (partial excision), J03 (extirpation of lesion) and J10 (transluminal operation on blood vessel)
- 605 AngCN patients recorded against those procedures during 2004 – 2009
- Trend is difficult to predict for the future (81, 80, 98, 106, 106, 134) – compound growth rate of just over 10% a year.
- 67% of patients have Primary Cancer Diagnosis code registered as 'Unknown Primary'
- 28% of AngCN patients are sent out of the region for liver mets surgery
- 20% of current liver mets business at the 3 centres is from patients living outside of the region
