

## Appendix F – Performance Data April 2015 to March 2016

The IRMP document gives details of information, facts and figures using predominantly the previous 5 years from April 2010 to the end of March 2015. The following information gives the overview of statistics from April 2015 to the end of March 2016. It should be noted that due to the recent end of the 2015/16 data period there are still some incident report forms outstanding from fire stations following incidents attended.

### Incidents Attended

Figure 1 shows a similar graph as on page 20 of the IRMP with an additional bar showing the financial year 2015/16.

This indicates a small increase of incidents compared to the previous year and follows the general trend over recent years of a plateau in activity. The figure of 4,932 is expected to rise slightly as further reports are received.

**Figure 1 – Incident categorisation as in the IRMP, including the 2015/16 fiscal year**

### Response Standards

Figure 2 shows the Response standards from April 2015 to end of March 2016.

**Figure 2 – Response Standards Suffolk April 2015 to end of March 2016**

	<b>Standard 1</b> 1st Appliance Committed to Building Fire within 11 minutes	Number of Building Fires	<b>Standard 2</b> 2nd Appliance Committed to Building Fire within 16 minutes	Number of Building fires requiring a second fire engine	<b>Standard 3</b> 1st Appliance Committed to an RTC within 13 minutes	Number of RTCs
<b>Suffolk</b>	<b>73.90%</b>	<b>599</b>	<b>77.54%</b>	<b>373</b>	<b>72.60%</b>	<b>277</b>

The above compares with the figures from page 13 of the IRMP showing county wide response standards for 2014/15 as displayed in Figure 3 below;

**Figure 3 – Response Standards from 2014/15 as displayed in the IRMP**

	<b>Standard 1</b> 1st Appliance Committed to Building Fire within 11 minutes	Number of Building Fires	<b>Standard 2</b> 2nd Appliance Committed to Building Fire within 16 minutes	Number of Building fires requiring a second fire engine	<b>Standard 3</b> 1st Appliance Committed to an RTC within 13 minutes	Number of RTCs
<b>Suffolk</b>	<b>64.81%</b>	<b>645</b>	<b>71.98%</b>	<b>389</b>	<b>77.85%</b>	<b>316</b>

The data shows that response standards 1 and 2 have improved and 3 has got worse in the last 12 months when compared to the period 2014/15.

### Fatality and Casualty Data

Page 22 of the IRMP (figure 7) shows the numbers of fatalities and casualties over the last 5 years; this has been recreated in Figure 4 (below) with the additional 2015/16 data in the final column.

**Figure 4 – Casualties and fatalities (figure 7 of the IRMP) with an additional column for 2015/16**

	2010/11	2011/12	2012/13	2013/14	2014/15	2015/16
Fire Fatalities	8	2	3	6	4	5
Fire Casualties	52	42	24	34	41	47
Road Traffic Collision Fatalities	11	14	13	17	9	19
Road Traffic Collision Casualties	178	154	194	195	185	151
Other Special Service Fatalities	13	11	10	9	16	15
Other Special Service Casualties	35	30	38	34	50	50

Page 22 of the IRMP (figure 8) shows the number of casualties and fatalities as a result of just dwelling fires over the last 5 years; this has been recreated below with the additional 2015/16 data in the bottom row.

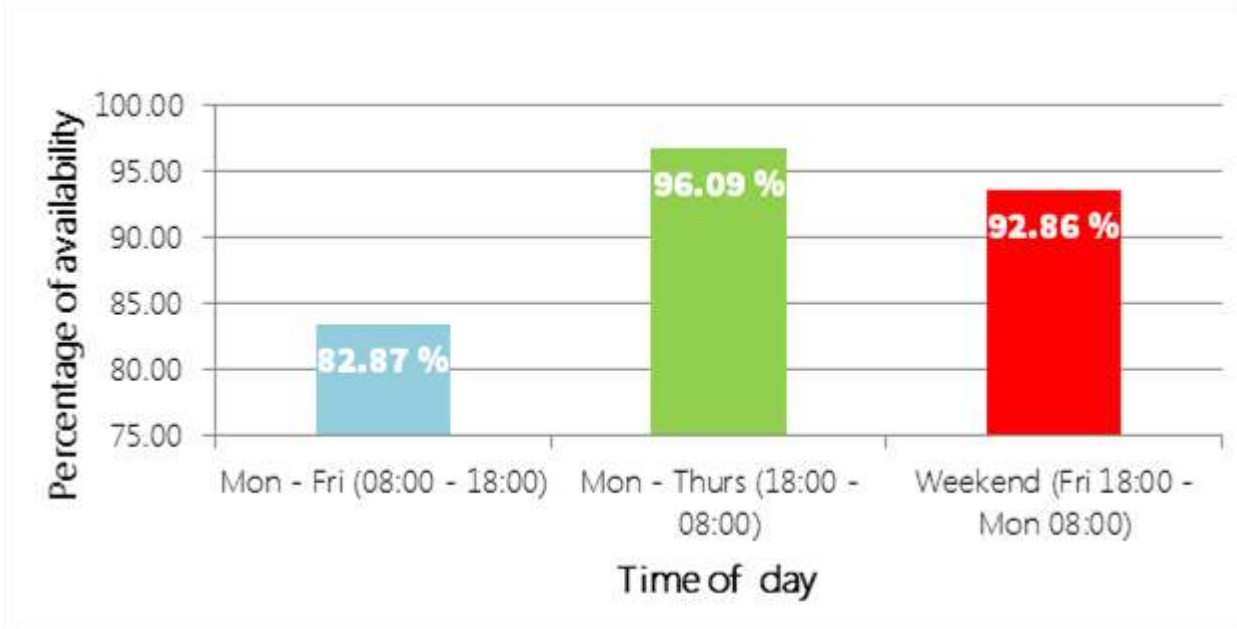

**Figure 5 – Dwelling Fires (figure 8 from IRMP) with an additional row for 2015/16**

Dwelling Fires 2010-2016					
Year	Total	Accidental or Cause Unknown	Deliberate or Other Cause	Injuries	Fatalities
2010-11	420	363	57	34	5
2011-12	356	322	34	31	1
2012-13	299	280	19	14	2
2013-14	302	269	33	23	4
2014-15	320	288	32	22	2
2015-16	304	279	25	35*	3

On-Call Fire Engine Availability

The availability of our on-call fire engines over 1 year is shown on page 21 of the IRMP, this is reproduced below in Figure 6.

**Figure 6 - the average availability of the Service’s on-call fire engines in the 12 month period from January 2014 to January 2015.**

As commented in the IRMP availability is very good at nights and weekends but drops to just above 80% during the day, Monday to Friday, when many on-call firefighters are unavailable due to other work commitments. The Service is progressing a number of initiatives to improve the availability of on-call fire engines.

Below is the comparative graph (Figure 7) for January 2015 to January 2016. It shows a slight improvement in the availability of our on-call firefighters

**Figure 7 - the average availability of the Service’s on-call fire engines in the 12 month period from January 2015 to January 2016.**
